

Shabana K M

Department of CSE, Nila Campus, IIT Palakkad, Kanjikode West, Palakkad, Kerala - 678623

shabana.meethian@gmail.com ◊ <https://shabanakm.github.io/>

RESEARCH INTERESTS

Artificial Intelligence in Education, Machine Learning

EDUCATION

Indian Institute of Technology, Palakkad

Doctor of Philosophy

Supervisor: Dr. Chandra Shekar Lakshminarayanan

July 2019 - Present

CGPA: 10/10

National Institute of Technology, Calicut

Master of Technology, Computer Science and Engineering

Gold Medalist

July 2011 - June 2013

CGPA: 9.73/10

Amrita Vishwa Vidyapeetham

Bachelor of Technology, Computer Science and Engineering

Silver Medalist

July 2007 - May 2011

CGPA: 9.8/10

EXPERIENCE

Flytxt, Trivandrum

Research and Development Engineer

June 2013 - December 2016

- Worked on projects related to customer segmentation in telecom domain and developed novel algorithms for performing automatic intelligent grouping of subscribers. Designed interesting visualizations for leveraging value out of large structured/ unstructured data sources, which were later added to the visualization dashboard of the company's product. Presented our work in international conferences and filed patents.

HONORS AND AWARDS

- Prime Minister's Research Fellow (PMRF May 2020 lateral entry scheme)
- Second prize in the engineering sciences category of Saransh 2023 organized by Indian National Young Academy of Science (INIAS)
- Part of the team that finished second in the Data Challenge held as a part of CODS-COMAD 2024
- First prize winner in the First Teaching Challenge on introductory programming organized by iSIGCSE
- Second prize in Compute 2021 teaching challenge organized by iSIGCSE
- Software Design National Finalist at Microsoft Imagine Cup 2009
- Collaboration Award at Flytxt for demonstrating good team work towards achieving the company's objectives
- All India Rank 272 out of 136027 students in the Computer Science and Information Technology paper of the Graduate Aptitude Test in Engineering (GATE 2011)
- Ada Lovelace best outgoing girl student award for the year 2010 in Amrita School of Engineering, Amritapuri

PATENT

- Systems and methods for management of multi-perspective customer segments ([US Patent 10,936,620, 2021](#)) (*First inventor*)

TEACHING EXPERIENCE

Internzone - Introduction to Machine Learning *IEEE Kerala Section*

August 2021 - February 2022

- Conducted weekly one-hour sessions on basic machine learning algorithms, as a part of PMRF teaching requirements. Designed and delivered the course content as well as prepared weekly quizzes and programming assignments. [\[Slides\]](#) [\[Recordings\]](#)

Introduction to Python programming and LaTeX *Government Polytechnic College, Palakkad*

March 2022 - May 2023

- Conducted weekly 1-2 hour hands-on sessions on python programming and LaTeX for final year Diploma students of the Computer Hardware Engineering department

SERVICE

- Chaired the session *Curriculum and Instruction* at the 23rd International Conference on Artificial Intelligence in Education (AIED 2022)
- Member of India Chapter of Special Interest Group on Computer Science Education (iSIGCSE)
- Chief coordinator of the Computer Science and Engineering (CSE) Research Symposium 2023, IIT Palakkad
- Department coordinator of the Institute Research Scholars Day 2022, IIT Palakkad
- As a *teaching assistant* for the courses *Artificial Intelligence Laboratory (2020, 2021)*, *Data Structures and Algorithms Laboratory (2020)* and *Introduction to Artificial Intelligence (2023)*, I helped conduct the weekly lab sessions and evaluate the student submissions.
- As a *teaching assistant* for the course *Game Theory and Mechanism Design (2022)*, I helped evaluate assignments and exam scripts.
- As a *teaching assistant* for the course *Technical Writing (2023)*, I prepared the lesson plan, course materials and assignments for the sessions on Introduction to LaTeX and Beamer for first year post-graduate students in the department of CSE. I also conducted the sessions and evaluated the assignments submitted by the students.

PROJECTS

Understanding the Indian labour market: A data-centric approach

In this project, we used the Aspiring Minds's Employability Outcomes 2015 (AMEO 2015) dataset to identify the significant factors that influence the salary and jobs offered to engineers graduating from India. Predictive modelling of salary was performed using different machine learning techniques on the data set that included both employee profiles and their employment outcomes. Decision tree analysis, feature analysis, correlation analysis and t-test were performed to identify the significant factors that influenced the annual salary offered to a candidate. Visualizations generated based on employee salary, designation and job city revealed interesting insights. *[ACM IKDD CoDS Data Challenge 2016]*

Karshik

Karshik is a small scale, service administering project. The objective of this project is to make vital statistics about crops pertaining to a certain topology, geographic location and climatic conditions available to farmers in India, so as to equip them with information for producing better yields. *[Microsoft Imagine Cup 2010]*
